éirigi

THERE IS NO DIFFERENCE!

The men overleaf are the leaders of Ireland's nine biggest political parties. While each of them claims to be different, the truth is they are all the same. Despite their never-ending squabbling and rhetoric, all the main political parties are actually saying the same thing when it comes to the major challenges facing the Irish people today.

The Economy: The world in general and Ireland in particular are facing the greatest economic crisis in decades. Despite the fact that capitalism created this mess Ireland's biggest political parties remain totally committed to the capitalist system. How can the cause of the disease also be the cure? It just doesn't make sense.

The Occupation: Britain continues to occupy the Six Counties, with no prospect of a withdrawal in sight. All of the main political parties now support or accept the occupation. None of them are doing anything practical to bring about Irish freedom.

A Real Alternative: éirígí is a socialist republican political party formed in 2006. We are campaigning for an end to British rule in Ireland and the creation of an Irish Democratic Socialist Republic. We want to see an Ireland where everyone gets their fair share of the country's power and wealth.
